

Environmental Epidemiology Journal

environmentalepidemiology.com

- We are an official journal of ISEE and contribute to its mission by publishing high-quality epidemiologic research and methodologic innovations in environmental epidemiology, with emphasis on health effects related to the chemical, physical, biological and social environment, climate change, and the built environment
- We publish four issues of Environmental Epidemiology per year, each with approximately eight original articles, brief reports, or review articles, approximately one insightful commentary or editorial pertaining to environmental epidemiologic research, and approximately two research letters or letters to the editor
- Since 2017 we have accepted 168 manuscripts from dozens of countries (usually one month between acceptance and publication)

Manuscripts Received 2017 – 2021 YTD (July 31)
