

- We are an official journal of ISEE and we publish original research from all fields of epidemiology. The journal also welcomes review articles and meta-analyses, novel hypotheses, descriptions and applications of new methods, and discussions of research theory or public health policy. We give special consideration to papers from developing countries
- We recently had 3 commentaries on ISEE pages (Greening ISEE, Environmental Epidemiology and GBD, Weight of Evidence Approaches)
- Our impact factor remains steady at about 5 and the number of submissions is up. Median time to desk reject remains 2-3 days (~80% of submissions) and the median time to first decision for reviewed papers ~35 days
- We have published about ten papers on COVID-19, including one that documents larger inequities after accounting for missing data on race/ethnicity.
